Market Review

In May 2023, the MSCI India IMI index was up 4.1%. It outperformed other global indices like MSCI EM which was down -0.2%, as well as US equities (S&P 500) and MSCI World, which were up 1.9% and 0.5%, respectively.

Foreign Institutional investors (FIIs) were net buyers to the tune of US\$4.5bn, while net selling by domestic institutional investors (DIIs) was US\$0.4bn. For the month, the Rupee depreciated by 0.3% vs the GBP while the 10-year G-Sec yields softened from 7.1% to 7.0%. Commodities were down, with Brent and S&P GSCI Industrial Metals Index declining by 8.2% and 5.6%, respectively.

For the month, Consumer Discretionary, Industrials and Consumer Staples outperformed, while Utilities, Materials and Energy underperformed. Large caps have underperformed mid and small caps this month, while State-owned entities underperformed their private peers.

Performance Review

The Fund was up 6.6% in May 2023, underperforming the benchmark by 260bps. The key contributors include Kaynes Technology (+45.3%), Cholamandalam Inv (+21.0%), and Tega Industries (+37.1%), whereas Larsen & Toubro (-6.4%), Aether Industries (-4.6%), and HDFC Bank (-3.1%) were the key detractors.

Ashoka India Equity Investment Trust PLC

⁴ Refers to aggregate assets under management or investment advisory for White Oak Group

⁵ The beginning NAV of 98 has been rebased to 100 for comparison with the benchmark and share price.

⁶ On-going charges ratio calculated on a 6-month moving average of net assets.

Important Information

This document has been issued for information purposes only. It does not contain any advice, investment recommendations or any offer, invitation or inducement to invest in the Company. Investors should seek advice from an authorised financial adviser prior to making investment decisions.

Capital may be at risk as the value of investments may go down as well as up and is not guaranteed; therefore investors may not get back the amount originally invested. Past performance is not a guide to future performance, nor a reliable indicator of future results or performance.

The cost of investment may increase or decrease as a result of currency and exchange rate fluctuations. Currency fluctuations will also affect the value of an investment. Investments in shares of smaller companies are generally considered to carry a higher degree of risk as the market for their shares may be less liquid than that for shares of larger companies, making shares of smaller companies more difficult to buy and sell.

The performance of shares of smaller companies may be more volatile than the shares of larger companies over short time periods; therefore investors should regard such investments as long term. There can be no guarantee that the investment objective of the Company will be achieved or provide the returns sought by the Company.

An investment in the Company is only suitable for investors who are capable of evaluating the merits and risks of such an investment and who have sufficient resources to be able to bear any losses which may arise from such an investment (which may be equal to the whole amount invested). Such an investment should be regarded as long term in nature and complementary to existing investments in a range of other financial assets and should not form a major part of an investment portfolio.

The Company is a public limited company and an investment trust, the shares of which are traded on the premium segment of the main market of the London Stock Exchange. Accordingly, the ability of shareholders to sell their shares will be dependent on the market price of the shares. The shares may trade at a discount or premium to their net asset value. The Company may borrow money in order to make further investments. This is known as gearing. The effect of gearing can enhance returns to shareholders in rising markets but will have the opposite effect on returns in falling markets.

Economic and market forecasts presented herein reflect a series of assumptions and judgments as of the date of this presentation and are subject to change without notice. Emerging markets securities may be less liquid and more volatile and are subject to a number of additional risks, including but not limited to currency fluctuations and political instability.

None of White Oak Capital Partners Pte. Ltd., White Oak Capital Management Consultants LLP, Acorn Asset Management Ltd or the Company, nor any of their respective directors, partners, employees, agents or representatives, shall be liable for any damages whether direct or indirect, incidental, special or consequential including lost capital, lost revenue or lost profits that may arise from or in connection with the use of this information.

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by White Oak to buy, sell, or hold any security. Views and opinions are current as of the date of this page and may be subject to change, they should not be construed as investment advice.

This is an actively managed portfolio that is not designed to track its reference benchmark. Therefore, the performance of the portfolio and the performance of its reference benchmark may diverge. In addition, stated reference benchmark returns do not reflect any management or other charges to the portfolio, whereas stated returns of the portfolio do.

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which the Company's portfolio is constructed.

Any award/s referred to in this document may not be representative of a particular investor's experience or the future performance of the Company or any other White Oak funds.

In the United Kingdom this material is a financial promotion and has been issued by White Oak Capital Management (UK) Ltd regulated by the Financial Conduct Authority.
